

Falkirk

**The Falkirk Index System
is generating the largest
private genetic client base
in the Tri-Nations.**

Principal Director ~ Ian Walsh

Falkirk Scientific Foundation was founded in the Northern King Country to promote excellence in genetics across specie and breed. The focus of defining the optimal animal through the use of ultrasound technology and sound stock judgment is enhancing the genetic and financial outcomes of an expanding client base. **The Falkirk Index System is a proven holistic method of animal selection** that determines the genetic value and commercial worth of an animal. Client referrals leverage growth.

Falkirk is the unconditional prime systems advocate to move the sheep, beef and dairy industries to a true marketing environment for specified product through the conduit of value based payment systems.

Falkirk

- Has become a brand partner in the Campaign for Wool
- Certified rams are being actively sought due to quality outcomes
- Clients' slaughter animals are superior on analyses
